WOOD, GLASS & STONE PROCESSING

Electric Motors Production

A dynamic, strong and ambitious Group

Orange1 Holding is an international renown Group, one of the most important European manufacturers of single-phase and three-phase asynchronous electric motors. It has an annual capacity of more than 1 million motors and 5 million electric stators. The group, established in 1971 by Leone Donazzan, chaired today by his son Armando Donazzan, is strongly focused on technological innovation, performance and customization to meet individual clients requirements.

Elettromeccanica Leone Donazzan was established on 1971 in Bassano del Grappa. In 1983 the company turned into Eld Spa. In 1998 Armando Donazzan took over the running of the company; thanks to his determination and intuition he applied new financial and commercial policies which increased the level of reliability and visibility. In March 2006 the company changed its name to EME Spa and finally become Orange1 Electric Motors in 2018. The aim of O1EM is to manufacture custom made motors to meet clients and market expectations. The actual production covers a large range of AC and DC motors, as well as brushless motors and Variable Frequency Drives , to provide total solution.

PRODUCTION PLANTS

PARMA - ITALY 43122 (PR) Via Mantova 93	ATEX MOTORS HYDRAULIC MOTORS ENCAPSULATED WATERPROOF MOTORS OIL SUBMERGED MOTORS

BEAM SAWS

Beam saws are one of the most effective methods of precise panel cutting, especially for wood or stones. With semi-automatic adjustments, the saw can be used to work with a range of different tasks all in one day, although some of them require manual manipulation. Orangel can provide beam saws motors in accordance to customer requirements in terms of speed, frame and performances.

EDGE BANDERS

With the help of a specific electric motor the edge bander machine for wood, glass or stone bonds the edge banding to the substrate, trims the leading and trailing edges, trims top and bottom flush with the substrate, scraps any surplus, and buffs the finished edge. Orangel can provide the best motors solution in accordance to the customer project for his machines ensuring the best precision, performance and duration over time.

PROFILING MACHINES

Profile machines are machines which work with large volumes of material. They require high amounts of energy, space and maintenance. The speed at which the wood or glass sheet passes along the band is a large factor in determining the machine's efficiency. Orangel can provide the best solutions in the best solutions in terms of efficiency even in small motors, to guarantee the best performance even in the most compact machines.

DRILLING SOLUTIONS

Drilling machines use a drilling tool that has cutting edges at its point. This cutting tool is held in the drill press by a chuck or Morse taper and is rotated and fed into the work at variable speeds. The electric motor is a fundamental part for a drilling machine: Orangel is able to guarantee the best performance and durability in all its motors dedicated to this application and specially built for the customer needs.

VERTICAL AND HORIZONTAL MACHINING CENTER

Machining centers are multi-functional machines that allows with great flexibility to carry out an elevated number of mechanical operations thanks to the ability to have a large number tools in the changer., such as milling, boring, threading, drilling, etc... Orangel is the perfect partner thanks to his Know-how in the wood and glass processing sector. Our R&D department can provide the best solutions for the customers, in accordance to their projects and requirements for vertical and horizontal machines. Thanks to our experience and internal testing laboratories we can guarantee the best performance combined with excellent reliability and after-sales assistance.

MOTORS PRODUCTION

for wood, glass & stone processing applications

SINGLE PHASE & THREE PHASE ASYNCHRONOUS MOTORS

Orange1 Electric Motors

One speed or two speeds three phase motors manufactured in accordance with different specifications requested by the clients. Available in 2-4-6-8 pole from 0,09 kW up to 30 kW, in aluminum housing IEC 56 up to IEC 180. UL/CSA approval available on demand.

SINGLE PHASE & THREE PHASE ASYNCHRONOUS MOTORS

Orange1 Electric Motors

O1EM has a wide range of ATEX Motors covering most of the customers request: Ex db, EX db eb, Ex eb, Ex ec. - Frame sizes from 56 to 180 Zone 1, 2, 21 and 22 - 2G, 2GD, 3GD Certifications ATEX, IECEx, EAC, KCs, cCSAus

GRADUAL BRAKE MOTORS

Orange1 Electric Motors

Motors equipped with brake offering a gradual and silent brake stop of the moving parts in accordance with the regulation of safety in workplace. The motors are made in single and three phase, single or double speed, 2-4-6-8 poles from 0,13 kW up to 18,5 kW. On demand it is available IE3 efficiency, IE3 approved.

ENCAPSULATED WATERPROOF MOTORS

Orange1 Electric Motors

We have developed a process using a special resin material that makes the electric internal parts of the motors completely waterproof. The motors are resistant to the most hostile environments in terms of presence of water and humidity. All the motors of our range could be manufactured with this technology with no restrictions.

INVERTER FOR ELECTRIC MOTORS

Orange1 Electric Motors

The Inverter is an electronic device designed to convert direct current DC power input into alternating current output. This device is mainly used to control and change the frequency of the asynchronous electric motors in industrial application. Without the VFD these motors will run with constant speed as they get a constant frequency

MOTORS PRODUCTION

for wood, glass & stone processing applications

NGBe BRUSHLESS SERVOMOTORS

Sicme Orange1

The NGBe brushless servomotors are designed to meet the increasingly demanding needs of the automation industry, which require high-performance systems, greater reliability, and reduced maintenance. We used high-quality materials to develop the NGBe series. The new aesthetic and functional details introduced allowed us to reduce the overall dimensions, resulting in great savings for the customer.

LOW CENTER MOTORS

Orange1 Electric Motors

This range of motors will be used in application where high power is combined to low centre. Available with blade discs or flange. Special arrangements with collet chuck shaft end on demand. Motors are made for inverter duty in 2 and 4 pole single and three phase. Available with Gradual brake and/or UL approval from 0,25 kW up to 15 kW.

WHY CHOOSING ORANGE1 PREMIUM SOLUTIONS

in steel, wire & lamination applications

Since the 1970s, the Orange1 group companies have grown exponentially thanks to the relationship and technical collaboration with leading companies in the wood sector, which over time have also associated with their production the machinery for processing marble and glass.

Born with these specific solutions, Orange1 has evolved by offering **innovative and competitive solutions** to our old and new customers in the sector, **to efficiently solve problems related to safety at work** (such as the on-board braking system in the motors), **to reduce the overall dimensions of the motors**, the **accurate balancing of the shaft**, the uncompromising choice of **high quality components** able to withstand **heavy radial loads**, up to the most recent adaptations to the highest energy efficiency classes and **world safety standards**.

MADE IN ITALY GUARANTEED

HIGH LEVEL OF CUSTOMIZATION

RELIABILITY & DURABILITY

QUALITY

100% TESTED

SICME-ORANGE1 SERVICE

Sicme-Orange1 quality and technical team, together with a dedicated internal department, offers a full service system able to satisfy any specific request into electric motor maintenance. Sicme-Orange1 Service can provide an innovative diagnostic tools for electrical testing and analysis to pinpoint immediately specific motor issues. For this purpose an equipped in-house testing room is available, in order to handle tests, inspections and issue detailed test report for each motor.

More than 15.000 motors running for wire & steel application with worldwide presence, in the most severe and various working conditions
